

BUSAN FOREIGN SCHOOL

Embracing Diversity, Striving for Excellence

August 2017

Hello and welcome to Middle School Science 2017-2018.

This is going to be an amazing year of exploration and interpretation of the physical world around us.

I Mr. Scotty Cressey and I will be the students new guide this year through the vast and brilliant phenomena that encompass all that is Earth, Life and Physical Science. I am very excited to get started as I have planned a very rigorous, engaging year of activities and study that will be both interesting and fun for all students. *Let the celebration of science begin.*

A Little About Me

I am originally from Ontario, Canada, where I completed my undergrad an Honours Bachelor of Science Majoring in Biology with a minor in Chemistry and Geography at Lakehead University. I have worked for several years with many government and private agencies as a Fisheries Jr. Biologist and an Aquatic Technician. I received my Bachelor of Education at Nipissing University and since taught Highschool Chemistry, Astronomy and Science as well as Middle School Earth, Physical and Health Science. I have found my passion is science and my heart is with the Middle Schoolers. I enjoy building a rapport and instilling a true interest in the subject matter whether they go on to study science or not. I feel the best way to do this is to make the year enjoyable. So here's to a new a year full of opportunities and I thank you for the opportunity to share my love of this subject with your sons and daughters.

PLEASE always remember that if you have any concerns or questions feel free to contact me at any time.

"The most incomprehensible thing about the world is that it is comprehensible." Albert Einstein

Required Materials

- A4 (or similar) 5 subject Spiral notebook (MEAD or 5 Star) or three ring binder.
- Erasers/Pencils
- Calculator
- The course textbook as it is required
